

BB Tools, I NC.

Easy to use hand tools
consistent sharp cable cuts

These cutters were designed for cutting stranded cable cleanly, leaving no frayed ends as well as stranded wire, and piano wire.

They are manufactured from aircraft quality ALLOY Steel, and to insure long life on the cutting edge, the tools go through a complex treating process, giving them a file hard surface with a tough core.

Unlike most cutting tools, ours are zinc-plated with a gold iridite finish for rust protection. We incorporate a unique handle design for added leverage with thick "T" shaped vinyl grips for cutting ease.

A must tool for the shop!

For the Maintenance / Repair Technician:

- * stranded control cables
- ***like those on the garage doors***
- * stainless wire
- * piano wire / pins

For the Hobbyist & RC'er - It cuts the:

- * stranded control cables
- * stainless wire
- * cap screws
- * piano wire

A must for the toolkit

For Deep Sea Fishing

- * stranded control cables
- * stainless leader wire
- * Hooks
- * Rigging cable

Specifications

Description

These cutters were designed for cutting stranded cable cleanly, leaving no frayed ends. The tool will cut safety wire as well as piano wire. They are manufactured from aircraft quality ALLOY STEEL. To insure long life of the cutting edge the tools go through a complex heat treating process, giving them a file hard surface with a tough core. Unlike most cutting tools ours are zinc plated with a gold iridite finish for rust protection. We incorporate a unique handle design for added leverage with thick "T" shaped vinyl grips for cutting ease.
